Business services overview

By delivering fuel directly to the location of your service fleet vehicles, FuelDash lowers your annual labor costs from having employees stop to fuel their service vehicles during their hours on the job. Our services also help reduce workflow disruptions and eliminate you having to over-pay for fuel while out on the road. With our business services, you will minimize vehicle downtime, increase productivity and profits, and streamline your fleet efficiency all while enjoying our unmatched convenience, safety, savings and security.

Our mobile fueling platform is designed specifically for businesses with service vehicles, fleet vehicles, heavy equipment and on-site fuel storage tanks. We deliver top-tier 85, 87, and 91 octanes – as well as (D-1) and (D-2) diesel fuel.

The traditional gas station model is outdated. It wastes time, disrupts daily routines, lacks convenience, safety and security, and creates anxiety - and most often - has difficult access entry and exits for your service vehicles.

Our mobile, on-demand refueling business services are ideal for plumbing, electrical, consumer home repair and service businesses, municipality, delivery, and landscaping businesses - businesses with dozens or hundreds of service or fleet vehicles. Businesses that seek cost-effective fuel delivery services with fuels other than (*but including*) diesel, for their service vehicles at the office, lot, service yard, job location, or somewhere out in the field. Or, if you're looking to provide a tax-deductible benefit for your valued employees.

In short, FuelDash isn't just delivering fuel - it's delivering freedom, convenience, safety, security, savings, and time back to those who need it most.

What does it cost you to keep gassing up yourself?

The real hidden costs of getting your own fuel are associated with labor and a lack of productivity. Wear and tear on your service vehicles from driving to and from the gas station are also a factor. Use this formula guide below to quickly determine your hidden costs of getting your own fuel:

$$\begin{matrix} \$1,540.00 & \times & \frac{?}{\text{---}} & = & \frac{?}{\text{---}} \\ \text{Costs of 1} & & \text{How many} & & \text{Your annual} \\ \text{employee to fill 1} & & \text{service vehicles} & & \text{costs in labor} \\ \text{vehicle per year} & & \text{you have} & & \text{alone} \end{matrix}$$

Let's check the math...

Consider the loss in production and the added expenses for a business that has a multitude of services vehicles on the road.

20

If the average trip to the gas station takes 20 minutes...

\$25.24

And your hourly wage is \$25.24 per hour... *(National average)*

\$8.41

Your business could be wasting \$8.41 per individual fuel trip.

183

Trucks and service vehicles on average need to be refueled 183 times each year.

\$1,540

This means that the business is paying more than **\$1,540.00 per vehicle each year** in costs of labor alone. *(Assuming you have 1 employee per truck).*

\$15,400

That's more than **\$15,000.00 per year** for a fleet of just **10** service vehicles. Plus, the additional costs in wear and tear of each vehicle being on the road to and from the gas station.

\$53,866

Or... That's more than **\$53,000.00 per year** for a fleet of **35** service vehicles. Plus, the additional costs in wear and tear of each vehicle being on the road to and from the gas station.

How does this work?

There is no mark-up on the fuel, nor are there any hidden or added delivery fees. Your business will pay the average price of fuel in your zip code and will be charged a single \$4.99 delivery fee – per order - not per vehicle. Additionally, there are no monthly charges to “be a customer”. It is easy to sign up, and even easier to place an order. There is no more affordable option for having your fuel delivered to your vehicles.

Did you know... Our on-demand fuel delivery services are a tax-deductible employee benefit for your employees? Offer a fuel benefit to your employees and enjoy the write-off! Ask us about this benefit when we discuss your business services.
